## Post Procedure Skin Care and Hair Care

Exovex is designed to be applied topically in conjunction with facial or scalp microneedling, and energy based aesthetic devices to accelerate recovery time and enhance treatment results. It synergistically improves the appearance of discoloration, tone, texture, and fine lines.

Exovex aesthetic skincare serum can reduce post procedure downtime and burning sensation and may reduce the signs of aging caused by the stress of modern living for all skin types, every time!

1. **exovex REVIVE**  
Perfectly balanced, stabilized and naturally secreted growth factor blend, Exovex REVIVE complements post procedure **facial maintenance and undereye** treatment helping with downtime reduction and improvement of the appearance of a younger skin.
2. **exovex RENEW**  
The ideal partner to a **deeper facial aesthetic and small alopecia spot treatment**, Exovex RENEW is a well-balanced, stabilized and naturally secreted growth factor blend that assists with post procedure downtime and burning sensation, as well as helping expedite the desired effects of the treatment.
3. **exovex REVEAL**  
Designed for **larger aesthetic post procedure applications** that combine full face, neck and décolleté, or for **medium scalp treatment**, Exovex REVEAL helps in expedite the desired effects of the treatment, and assists in reducing post procedure downtime and burning sensation.
